

## The top cardiology stories of 2015 – what you need to know.

Join world-renowned experts in conversation about the most important advances in cardiovascular medicine in 2015. Presented in short interviews, this series offers five, must-see programs for all clinicians managing patients with, or at risk for, cardiovascular disease.

### HIGHLIGHTED PROGRAM

Coming to your doorstep - a new reversal agent for dabigatran!

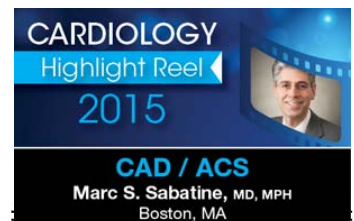

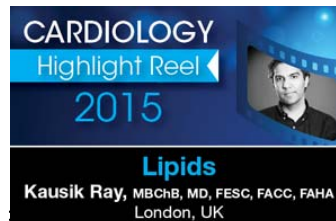

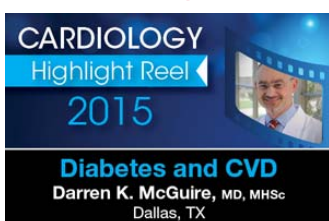

#### AF / Thrombosis

Join Dr. Jim Douketis in conversation discussing bridging warfarin, real-world data with NOAC's, and the introduction of the first NOAC reversal agent.

This program is eligible for **MOC RCPC, Section 2** or **CFPC Mainpro-M2 credits** through independent submission. Family physicians can complete a *Linking Learning to Practice* exercise through the CFPC Mainpro website to be eligible to receive **2 Mainpro-C** and **2 bonus Mainpro-M1 credits**.
